Get a face that doesn't even need makeup

Here's the thing: the better your skin is, the less makeup you need. So priority number one for a natural-but-better look is to get clear, even-toned skin. Susan Perry, a medical esthetician in San Francisco offers her best tips:

1. **Cleanse right:** It's key to bright skin. Use a **Clarisonic brush**, \$195 or washcloth to go over your entire face, massaging your skin to get a really deep clean. Follow up with toner.
2. **Exfoliate:** It'll help get rid of uneven tone and keep your skin clear. You can use lactic or glycolic acid peels or enzymes, like **Peter Thomas Roth's Pumpkin Enzyme Peel**, \$44.
3. **Protect your skin:** Use sunscreen (of course!) to protect your skin from the sun, and try products with Vitamin C in them to correct existing sun damage and prevent more from showing up. Try **Skinceuticals C E Ferulic Serum**, \$96.95. And for your lips, try **ChapStick Ultra Moisture Daytime Formula**, \$3.99.
4. **Dark circles:** If you're struggling with them, try products with Vitamin C and Vitamin K to lighten the area.
5. **Breakouts:** If pimples are a frequent issue, see a dermatologist for treatment. But for the occasional breakout, **DO NOT POP IT**. Instead, apply a spot treatment with benzoyl peroxide to kill the bacteria and dry it up.
